Adjective Review 形容词复习

An adjective is used to modify the noun(s) or pronoun(s) that are used in a sentence. Without adjectives sentences are very plain and simple. Therefore, adjectives are very important because they make the sentence more descriptive and interesting. Moreover, an adjective can be modified to create the comparative or superlative adjective forms. The comparative adjective form compares one noun or pronoun to another, whereas the superlative adjective form compares three or more adjectives.
