Fairy Tale 3: Snow White (A 1090 LEXILE Level Reading)

Long long ago, a king and a queen had a daughter who they called Snow White, but a month later the queen suddenly died. The entire kingdom was devastated by the loss of their queen, but eventually the king got over the death of his first wife and married another woman. The new queen was a very beautiful person but she was not a kind individual. The queen manipulated people with her evil spells and she even had a magical mirror as well.

Every day she would ask "Mirror, mirror, who is the fairest in the land?" and it always replied, "You my queen are the fairest of them all", but one day the mirror suddenly said something different. "My queen you are the fairest of them all but there will soon be another... When Snow White comes of age she will become the fairest of them all".

The queen was so angry that her stepdaughter would soon become even more beautiful than her, so the queen decided that she needed to kill Snow White before her sixteenth birthday. Fortunately the queen's evil plan failed and Snow White escaped from the castle. She ran into the forest where she found a very small house where she decided to hide in. Inside she found a little bed, seven of them actually, and since she was so tired she went to strait to the closes bed and fell asleep. She even had a single shoe still on her left foot when she fell asleep.

The house wasn't empty though. It belonged to a dwarf family and when they returned they were very surprised to find a girl asleep in their home. At first the grumpy dwarf wanted Snow White to leave but Snow White bagged all of them to let her stay. "Please do not send me away, my evil step mother will kill me if you do" cried Snow White. They could not just send an innocent child away, she was such a nice girl, so each and every dwarf decided to let her stay in their home. Eventually they became like a family and under their protection Snow White lived happily ever after.
